Auditor's report

To: The shareholders' of Juhayna Food Industries S.A.E

Introduction

We have audited the separate financial position of Juhayna Food Industries S.A.E as of 31 December 2025, and the related separate statements of income, comprehensive income, changes in equity and cash flows for the financial year then ended, and a summary of significant accounting policies and other explanatory notes.

Management's Responsibility for the Financial Statements

These separate financial statements are the responsibility of the Company's management. Management is responsible for the preparation and fair presentation of these separate financial statements in accordance with Egyptian Accounting Standards and in the light of the prevailing Egyptian laws, management responsibility includes, designing, implementing and maintaining internal control relevant to the preparation and fair presentation of separate financial statements that are free from material misstatement, whether due to fraud or error; management responsibility also includes selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express an opinion on these separate financial statements based on our audit. We conducted our audit in accordance with Egyptian Standards on Auditing and in the light of provisions of applicable Egyptian laws. Those standards require that we comply with ethical requirements, and plan and perform the audit to obtain reasonable assurance whether the separate financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the separate financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the separate financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the separate financial statements.

Hazem Hassan

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the separate financial statements.

Opinion

In our opinion, the separate financial statements referred to above present fairly, in all material respects, the separate financial position of Juhayna Food Industries S.A.E as of 31 December 2025, and of its separate financial performance and its cash flows for the year then ended in accordance with the Egyptian Accounting Standards and the Egyptian laws and regulations relating to the preparation of these separate financial statements.

Emphasis of a matters

Without qualifying our opinion, we draw attention to the following:

- 1- As mentioned in detail in note. (18) of the accompanying notes to the separate financial statements, which describes that one of the merged subsidiaries has a dispute regarding its tax exemption for a period of ten years from 2009 to 2018. A decision was issued by the Appeal Committee not to recognize the tax exemption for this merged subsidiary and to subject it to tax for the years 2009 to 2014. The merged subsidiary has filed a lawsuit to contest the decision of the Appeal Committee regarding the cancellation of the tax exemption granted by the decision of the Chairman of the General Investment Authority. The merged subsidiary, along with its legal and tax advisors, has studied the subsidiary's entitlement to this exemption, and the opinion concluded that the merged subsidiary is likely to receive a ruling in its favor. Therefore, no provision has been made for any obligation related to this matter, and it is considered a possible obligation for the merged subsidiary.
- 2- As mentioned in detail in note (39) from the accompanying notes to the separate financial statements, which describes that the Company's Extra Ordinary General Assembly meeting has agreed the merge for manufacturing sector companies and the process was registered in the commercial registry on 27 February 2025.

Report on Other Legal and Regulatory Requirements

The Company maintains proper books of accounts, which include all that is required by law and the status of the Company, and the separate financial statements agree thereto. The inventory has been counted by the Company's management in accordance with established practices.

The financial information included in the Board of Directors' report, prepared in accordance with by law No. 159 of 1981 and its executive regulation, is in agreement with the Company's books of accounts, within the limit that such information is recorded therein.

- Importation of all production inputs necessary to serve the Company's activities subject to applicable laws and regulations.
- Storage of the Company's products and other food items for the Company and third parties in compliance with all applicable laws regulations and required licenses.

In addition the Company may participate in merge with or acquire other companies or entities engaged in similar or complementary activities whether within Egypt or abroad in accordance with the provisions of the applicable laws.

Registration in the Stock Exchange

The Company is listed in Schedule (A) the Egyptian Stock Exchanges.

3- Basis of preparation

3-1 Statement of compliance with laws and regulation

The separate financial statements have been prepared in accordance with the Egyptian Accounting Standards ("EAS") and in the light of prevailing Egyptian laws.

The financial statements were authorized for issue by the Board of Directors on 12 March 2026.

3-2 Basis of measurement

- The financial statements have been prepared on the historical cost basis except some financial instruments are measured subsequently by either F.V or amortized cost.
- The financial statements have been prepared on going concern basis.

3-3 Functional and presentation currency

These separate financial statements are presented in Egyptian pound which represents the currency of the company.

3-4 Use of estimates and judgments

The preparation of separate financial statements in conformity with Egyptian Accounting Standards requires management to make judgments estimates and assumptions that affect the application of accounting policies and the reported amounts of assets liabilities income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes

Information about assumptions and estimation uncertainties that have a significant risk resulting in a material adjustment within the future financial statements are included in the following notes:

- Note (20, 26): impairment of trade and other debit balances.
- Note (16): decrease in non-current assets.
- Note (28): Recognition and Measurement of Current and Deferred Tax Assets and Liabilities.
- Note (26): Provisions and Contingent Liabilities

1-4-3 Estimates and Judgements

The Company uses estimates and assumptions related to the future, the accounting estimates rarely match the related actual outcome, and below are the estimates and assumptions with significant risk that could lead to important adjustment to the book value of the assets and liabilities in the next financial years.

Expected credit losses "ECL" on accounts receivable's balances.

The Company uses provision records to calculate expected credit losses for commercial customers; the provision rates are based on the customer Company's delayed days.

The provision record is initially based on the observed historical Group default rates; the Company calculates the matrix accurately to adjust the historical credit loss experiment with forward-looking information. For example, if the expected economic conditions (i.e. GDP and the overall inflation rate) are expected to deteriorate over the next year, which may increase the number of defaults in the industrial sector, the historical default rates are adjusted. At each reporting date, the historical default rates are updated and observed and changes in future-oriented estimates are analyzed.

The assessment of the relationship between the historical default rates that are observed, the expected economic conditions and the expected credit losses is a significant estimate. The experiment of the historical credit loss and expectations of the Company's economic conditions may not represent the actual default of the customer's payment in the future.

Impairment of non-current assets

At the end of each financial period, the Company assesses whether there is an indication that the carrying amount of any asset is lower than the recoverable amount and the extent of any impairment loss that may have happened and requires recognition. Determining the existence of impairment indicators requires the best possible estimates available to management based on the information obtained from the Company and through the market depending on previous experience.

When determining indicators for impairment in the asset, the Company estimates impairment loss using suitable valuation methods. Determining indicators for impairment and estimation of impairment value depends on elements that may vary from time to another in a way that may affect management's estimates.

Recognition and measurement of current and deferred tax assets and liabilities.

Income tax, whether current or deferred, is determined by the Company according to the requirements of Tax law.

Company's profits are subject to current income tax which implies the usage of material estimates to determine the total tax burden on income, and because it is hard to surely determine the final tax in some transactions through the financial period so the Company recognizes the deferred tax liability according to the estimate of the extent of final applicability of the transactions to tax and also the extent of a possibility of formation of additional tax during tax inspection. And when there are differences between the final result of tax inspection and previously recorded amounts, these differences are recognized in income tax and current tax liability in the period in which these differences are realized as it is considered as a change in accounting estimates.

To recognize deferred tax assets, the management uses assumptions about the extent of availability of sufficient future tax profits that allows the usage of recognized deferred tax assets and the Company uses assumptions related to the tax rate prevailing on the date of the separate financial statements which is expected to settle all tax assets and liabilities in the future.

This process requires using several complex estimates to estimate and determine the tax brackets and temporary discountable tax differences and subject to tax arising from the difference between the accounting basis and tax basis for some assets and liabilities, in addition to estimating the possibility of using deferred tax assets arising from deferred tax losses and this is along with performing estimates about future tax profits and the future plans for the operations of the Company.

Contingent Liabilities and Provisions

Management studies events and indicators that may give rise to an obligation for the company during its normal operating activities. Management uses such estimates and key assumptions to assess whether the recognition criteria for a liability are met in the standalone financial statements.

This includes analyzing available information to determine whether past events have resulted in a present obligation on the company and estimating the expected future cash outflows required to settle that obligation, as well as its timing. In addition, management selects the appropriate measurement basis to determine the value of the obligation with reasonable reliability.

4- Material accounting policies

The company consistently applies the following accounting policies throughout the financial periods presented in the financial statements."

4-1 Foreign currency

Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currency at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. In general currency gain or loss.

4-2 Investments in Subsidiaries

Subsidiaries are entities controlled by the Company. Control exists when the Company has power over the investee's relevant activities for the purpose of deriving benefits from its involvement with the investee, has exposure or rights to variable returns from its involvement, and has the ability to use its power to affect the amount of those returns. Investments in subsidiaries are recognized at cost, less any impairment losses. Each investment is assessed individually for impairment, and any impairment loss is recognized in profit or loss.

An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined had no impairment loss been recognized.

4-3 Equity accounted investees

Companies under joint control are companies over which the company exercises control jointly with another party. Joint control is in place when decisions on main activities require the unanimous consent of the controlling parties. Investments under joint control entities are presented in the separate financial statements using the equity method so that initial recognition is recognized at cost including costs associated with the acquisition and the subsequent measurement in the separate financial statements increases or decreases the carrying amount of the investment by the company's share of profit or loss.

4-4 Financial instruments

4-4-1 Financial assets

Classification:

The company classified its financial assets into the following measurement categories:

- Financial assets at fair value through profit or loss or through other comprehensive income and
- Financial assets measured at amortized cost.

The classification depends on the Company's business model for managing those financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains or losses will be recorded either in the statement of profit or loss or in other comprehensive income. For investments in equity instruments not held for trading, this will depend on whether the company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

Recognition and derecognition:

The normal way of buying and selling financial assets on the trade date which is the date on which the company has a commitment to buy or sell the financial asset.

A financial asset is derecognized when the contractual rights to receive cash flows from the financial asset expire or those rights are transferred in a transaction in which substantially all the risks and rewards of ownership of the financial asset have been transferred.

Measurement:

On initial recognition the company measures the financial asset at its fair value plus or minus in the case of a financial asset not at fair value through profit or loss statement transaction costs directly attributable to the acquisition of the financial asset. Transaction costs of financial assets at fair value through profit or loss are expensed in the statement of profit or loss.

Embedded financial assets are considered entirely embedded derivatives when determining whether their cash flows are solely payments of principal and interest.

Debt instruments:

The measurement of debt instruments depends on the company's business for managing the asset and characteristics of cash flow of the asset there are three measurement categories by which the company classifies debt instruments:

- **Amortized cost:** Assets held to maturity date to collect contractual cash flows where those cash flows represent only payment of original amount and interest are measured at amortized cost. Interest income from these financial assets is included in financing income using the interest rate method. Any gains or losses resulting from the disposal of investments are recognized directly in the statement of profit or loss and they are classified under other income / (expenses). Impairment losses are presented as a separate item in the statement of profit or loss.
- **Fair value through other comprehensive income:** Assets held for the purpose of collecting contractual cash flows and also for the purpose of selling financial assets where the cash flows of assets represent only payment of original amount and interest are measured at fair value through other comprehensive income. Changes in carrying amount are taken into other comprehensive income except for the recognition of impairment gains or losses interest income and foreign exchange gains and losses which are recognized in the statement of profit or loss. When the financial asset is disposed of the cumulative gain or loss previously recognized in other comprehensive income from equity is reclassified to profit or loss and recognized in other income/(expenses). Interest income from these financial assets is included in financing income using the interest rate method and impairment expense is presented as a separate item in the statement of profit or loss.
- **Fair value through profit or loss:** Assets that do not meet the criteria for depreciated cost or fair value through other comprehensive income are measured at fair value through profit or loss. Gains or losses on investment in debt instruments that are subsequently measured at fair value through profit or loss are recognized in profit or loss and are presented as a separate item in the statement of profit or losses in the period in which they arise.

Equity instruments

The company subsequently measures all investments in equity instruments at fair value. When the company's management chooses to present the fair value gains and losses on investments in equity instruments in the statement of other comprehensive income it is not subsequently reclassified to the statement of profit or loss after disposal of the investment. Dividends from these investments continue to be recognized in the statement of profit or loss as other income when the Company's right to receive dividends is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in other income/(expenses) in the statement of profit or loss. Impairment losses (and reversals of impairment losses) on investments in equity instruments that are measured at fair value through other comprehensive income are not recognized separately from other changes in fair value.

Impairment:

The company assesses the expected credit losses associated with the investment in debt instruments which are carried at amortized cost and fair value through other comprehensive income. Where the applied impairment methodology depends on whether there is a significant deterioration in the credit risk of customers the company applies the simplified approach allowed by Egyptian Accounting Standard no. 47 which requires recognizing expected losses over the life of the initial recognition of customers.

4-4-2 Financial liabilities and equity instruments issued by the company

Classification as debt or equity

Financial instruments are classified as either financial liabilities or equity in accordance with the substance of the contractual arrangement at the date of issuance of these instruments.

Equity instruments

Equity instruments represent any contract that gives the company the right to the net assets of an entity after deducting all of its obligations.

Equity instruments issued by the company are recorded at the value of the proceeds received or the net value of the assets transferred deduct the costs of issuance directly attributable to the transaction.

Financial liabilities

Financial liabilities are classified as either financial liabilities “at fair value through profit or loss” or other financial liabilities.

Other financial liabilities

The company has classified its financial liabilities as trade payables due to related parties’ borrowings and other credit balances which are initially measured at fair value net of transaction costs and are subsequently measured at amortized cost using the effective interest method with interest expense recognized on an effective yield basis.

The effective interest rate is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts the estimated future cash payments through the expected life of the financial liability or where appropriate a shorter period.

4-4-3 De-recognition of financial instruments

The company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset the company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the company retains substantially all the risks and rewards of ownership of a transferred financial asset the company continues to recognize the financial asset and recognizes a collateralized borrowing for the proceeds received.

4-4-4 Effective Interest Rate Method

The effective interest rate method is used to calculate the amortized cost of financial assets that are debt instruments and to allocate the interest income over the relevant periods. The effective interest rate is the rate that exactly discounts the estimated future cash receipts (including all fees and payments or receipts between the parties to the contract that form an integral part of the effective interest rate, transaction costs, and any other premiums) through the expected life of the financial asset or, where appropriate, a shorter period.

Interest income is recognized on all debt instruments using the effective interest rate method, except for those classified as financial assets at fair value through profit or loss.

Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated as at fair value through profit or loss) are recognized initially on the trade date which is the date that the Company becomes a party to the contractual provisions of the instrument. The Company derecognises a financial liability when its contractual obligations are discharged cancelled or expire.

The Company classifies non – derivative financial liabilities into the other financial liabilities' category. Such financial liabilities are recognised initially at the fair value plus any directly attributable transaction costs. After initial recognition these financial liabilities are measured at amortised cost using the effective interest method.

Other financial liabilities comprise loans and borrowings bank overdrafts and trade and other payables. Generally, trade payables are recorded at their nominal value.

Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of its short-term commitments.

4-5 Goodwill

Recognition & Measurement

Goodwill is recognized at cost, representing the excess of the consideration transferred over the fair value of the identifiable assets acquired and liabilities assumed.

After initial recognition, acquired goodwill is measured at cost less any accumulated impairment losses.

Impairment losses on goodwill are not reversed, and goodwill is not amortized.

4-6 Property plant and equipment

Recognition and measurement

Items of property plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses (note 16).

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor any other costs directly attributable to bringing the asset to a working condition for their intended use the costs of dismantling and removing the items and restoring the site on which they are located and capitalized borrowing costs.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property plant and equipment have different useful lives they are accounted for as separate items of property plant and equipment.

The gain and loss on disposal of an item of property plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of property plant and equipment and is recognized net within other income/other expenses in profit or loss.

Subsequent costs

The cost of replacing a component of an item of property plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced component is derecognized. The costs of the day-to-day servicing of property plant and equipment are recognized in profit or loss as incurred.

Depreciation

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property plant and equipment. Land is not depreciated.

The estimated useful lives are as follows:

Description	Estimated useful life (Years)
Buildings & Constructions	13.3- 50
Machinery & Equipment	More than1 year -13
Transportation & Transport Vehicles	5- 8
Tools	3 – 10
Empty plastic containers & pallets	5
Display refrigerators	5 years
Wells	25 or Wells useful life
Office equipment & Furniture	More than 1 year -10
Computers	3.33-5

Depreciation commences when the fixed asset is completed and made available for use. The depreciation method useful life and residual value are reviewed at each reporting date and adjusted as appropriate.

4-7 Projects under construction

Expenditures incurred on purchasing and constructing fixed assets are initially recorded in projects under construction until the asset is completed and becomes ready for use. Upon the completion of the assets all related costs are transferred to fixed assets. Projects under construction are measured at cost less accumulated impairment losses (note no. 17). No depreciation is charged until the project is completed and transferred to fixed assets.

8-4 Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets other than biological assets investment property inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. For intangible assets that have indefinite useful lives the recoverable amount is tested annually for impairment.

An impairment loss is recognized if the carrying amount of an asset or cash – generating unit (CGU) exceeds its recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing assets are grouped together into the smallest group of assets that generate cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU.

Impairment losses are recognized in profit or loss. For other assets an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortization if no impairment loss had been recognized.

4-9 Government grants

The company government grant is in the form of a loan at below prevailing market interest rate. The differences of the interest rates is initially recognized as deferred income and then recorded in the profit or loss in other income according to a regular systematic base over the loan period.

4-10 ROU

Items of ROU are measured at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized in profit or loss on a straight-line basis over the estimated useful lives or the lease term which ever is less.

4-11 Lease Contracts

Operating lease contracts

The company recognizes, at the commencement date of each lease, a right-of-use asset and a corresponding lease liability measured at the present value of unpaid lease payments discounted using the interest rate implicit in the lease or the company's incremental borrowing rate. Lease payments include fixed payments, variable payments dependent on an index or rate, residual value guarantees, purchase options reasonably certain to be exercised, and termination penalties, where applicable. Right-of-use assets are initially measured at cost and depreciated on a straight-line basis over the shorter of the lease term or the useful life of the asset.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company incremental borrowing rate. Generally, the Company uses the incremental borrowing rate as the discount rate.

The Company determines the incremental borrowing rate by obtaining interest rates from several external financing sources and making certain adjustments to reflect rent terms and the leased asset.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments including fixed payments in its substance.
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as of the commencement date.
- Amounts expected to be payable under a residual value guarantee.
- The exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

Short-term Leases and Low-value Asset Leases

Short-term leases are leases with a lease term of 12 months or less at the commencement date and that do not contain a purchase option.

Leases of low-value assets represent assets that are individually of low value and are considered immaterial to the company's financial position as a whole.

Payments related to short-term leases and leases of low-value assets are recognized as an expense on a straight-line basis over the lease term in the statement of profit or loss.

Extension & Termination

In determining the lease term, management considers all relevant facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option.

Extension options (or periods after termination options) are included in the lease term when the company is reasonably certain to exercise the extension option or not to exercise the termination option.

The company reassess the lease term if there is a significant event or change in circumstances that is within its control and affects its assessment.

Finance leases contracts (sale and lease back):

If an entity (the lessee) transfers an asset to another entity (the lessor) and re-leases the asset the entity must determine whether the asset is being accounted for as a sale transaction on that asset or not.

In case the transfer of the asset is not a sale transaction

The lessee must continue to recognize the transferred asset and must recognize a financial liability equal to the proceeds of the transfer.

4-12 Inventories

Inventories of raw materials supplies packing materials and spare parts are measured at the lower cost or net realizable value. The cost of inventories is based on the weighted average principle and includes expenditure incurred in acquiring the inventories production or conversion costs and other costs incurred in bringing them to their existing location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of the completion and selling expenses.

The inventory is measured at the lower of cost which is determined based on the cost of last process reached or net realizable value.

Finished production is measured at the lower manufacturing cost or net realizable value. The manufacturing cost comprises raw materials direct labor and cost includes an appropriate share of overheads based on normal operating capacity.

4-13 Impairment of Non derivative financial assets

The company applies the expected credit loss model (ECL) to measure impairment loss on its financial assets.

A loss allowance is recognized for expected credit losses on investments in debt instruments that are measured at amortized cost or at FVTOCI. The company uses the simplified approach and always recognizes lifetime expected credit losses (ECL).

4-14 Defined contribution plans

The Company contributes to the government social insurance system for the benefits of its personnel in accordance with the social insurance Law No. 79 of 1975 and its amendments. Under this Law the employees and the employers contribute into the system on a fixed percentage – of- salaries basis. The Company's contributions are recognized in the income statement using the accrual basis of accounting. The company's obligation in respect of employees' pensions is confined to the amount of contributions.

4-15 Provisions

A provision is recognized if as a result of a past event the Company has a present legal or constructive obligation that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation.

4-16 Revenue

Sales of goods

Revenue for sale of goods is recognized based on the transaction price of the received or receivable payment. The transaction price is determined considering returns, trade discounts and volume rebates. Revenue is recognized in the income statement when pervasive evidence exists of the settlement of contractual performance obligation by transfer of goods to the customer. Pervasive evidence usually exists in the form of an executed sales agreement. Settlement of the performance obligation has pervasively occurred when control over the goods has been transferred to the customer associated costs and possible return of goods can then be estimated reliably and there is no continuing control or involvement with the goods.

Discounts are recognized as a reduction of revenues when they will probably be granted and the discounts amount can be measured reliably. When discounts are granted over past performance obligations a provision is recognized in the balance sheet. In case a discount will be granted over future performance obligations a contract liability will be recognized.

No revenue is recognized if there is significant uncertainty regarding the collectability of the consideration or the associated costs or expected sales returns, or where the company retains continuing managerial involvement or effective control over the goods.

Revenue is measured based on the consideration specified in the contract with a customer.

Determination of the transaction price

The company determines the transaction price in its contracts with customers. In making this determination, the company estimates the effect of any variable consideration in the contract, such as discounts, rebates or penalties, and the existence of any significant financing component or any non-cash consideration specified in the contract.

Export subsidy revenue

Government subsidies on export sales are recognized as a percentage of the value of exported goods when there is appropriate assurance that the company will deserve support and all the necessary conditions for obtaining support are met.

4-17 Finance income and finance costs

Finance income comprises interest income from funds invested. Interest income is recognized as it accrues in profit or loss using the effective interest method.

Finance costs comprise interest expense on borrowings fair value losses on financial assets at fair value through profit or loss impairment losses recognized on financial assets.

Borrowing costs that are not directly attributable to the acquisition construction or production of a qualifying asset are recognized in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

Income tax

Income tax on the profit or loss for the year comprises both current tax and deferred tax.

Current tax

Current tax is recognized in the income statement except to the extent that it relates to items recognized directly in equity in which case it is recognized in equity. Current tax is the expected tax payable on the taxable income for the period using tax rates enacted or substantially enacted at the balance sheet date and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using tax rates enacted or substantively enacted at the reporting date.

A deferred tax asset is recognized for unused tax losses tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized at the next years.

4-18 Legal reserve

According to the Companies Law requirements and the statutes of the Company 5% of the annual net profit shall be transferred to a legal reserve until the accumulated reserve reaches 50% of the issued share capital. The reserve is un-distributable; however, it can be used to increase the share capital or to offset losses.

If the reserve falls below the defined level (50% of the issued share capital) then the Company is required to resume setting aside 5% of the annual profit until it reaches 50% of the issued share capital. The legal reserve is non-distributable.

4-19 Employee termination benefits

The Company does not have a pre-established retirement plan; however, termination benefits are recognized as an expense when the Company is clearly committed—without realistic possibility of withdrawal—to a detailed formal plan to terminate employment before the normal retirement date, in accordance with Labor Law No. (14) of 2025 and other relevant Egyptian legislation.

4-20 End of service benefits

When the company is committed clearly-without having the possibility of cancellation – a formal detailed plan to either finish the work before the normal retirement date. End of service benefits are recognized in the accordance with the relevant Egyptian labor laws.

4-21 Segmentation reporting

A segment is a group of associated assets and processes that are characterized by risks and rewards that differ from those of other segments or within a same economic environment with risks and rewards that are related to other segments operating in a different economic environment. All the operating results of the operating segments are reviewed regularly by the company's business leaders where the company makes decisions about the resources allocated to the segments and assesses their performance, which provides detailed financial information.

The group has (2)operational segments which represent segments for which financial reporting is provided to high management. These reports present different products and services and are managed separately because they require different technology and marketing strategies. The operation of each sector is reported below:

Segmentation reports

Dairy sectors

Juice & concentrate sector

Operations

Manufacture and sell dairy products & its derivatives

Manufacture and sell various products of juice & fruit concentrates

4-22 Related Party Transactions

Transactions with related parties conducted by the Company in the ordinary course of business are recognized in accordance with the terms approved by the Board of Directors.

5- Determination of fair value

A number of the Company's accounting policies and disclosures require determination of fair value for both financial and non- financial assets and liabilities.

The fair value of financial assets is determined based on the current purchase prices of those assets, while the fair value of financial liabilities is determined based on the current prices at which those liabilities could be settled.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

When the discounted cashflow method is used as a valuation technique, future cash flows are estimated based on the best estimates of management. The discount rate used is determined with reference to the prevailing market rate at the date of the financial statements for similar financial instruments in terms of nature and terms. Disclosures are provided in the notes to the separate financial statements regarding assets and liabilities whenever possible, as well as any additional information about the assumptions used in determining fair value in the notes related to those assets and liabilities.

The carrying amount of the company's monetary instruments measured at amortized cost approximates their fair value.

When measuring the fair value of an asset or a liability, the company uses observable market data the extent possible .

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows :

Level 1	Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2	Inputs other than the quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices).
Level 3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

- If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during where the change has occurred.

5-1 Non-derivative Financial Liabilities

The fair value for disclosure purposes is determined based on the present value of expected future cash flows, including interest payments, discounted using the effective interest rate at the financial statements date.

6- Cost of sales

	31/12/2025	31/12/2024
	L.E	L.E
Cost of revenues	20 018 726 068	-
Fixed assets depreciation	197 863 527	-
Right of use asset depreciation	9 247 483	-
Personal Expenses	285 028 939	-
Repair and Maintenance	727 295 917	-
Utilities Expenses	200 505 878	-
Operating lease expense*	90 370 846	-
Other production expenses	54 534 241	-
Inventory Provision	(10 159 496)	-
Cost of finished goods ready for sale	21 573 413 403	-

According to the Economic Performance Report issued by the General Authority for Investment and Free Zones dated 10 November 2024, and based on the Extraordinary General Assembly resolution of the Company dated 26 December 2024, the merger of these companies with Juhayna Food Industries Company was approved at book value as of 31 December 2023. The merger was officially recorded in the Commercial Register on 27 February 2025.

On 30 November 2021, the Board of Directors of Juhayna Food Industries Company resolved—based on a request from Arla—to cancel the partnership agreements entered into between Arjou and the other companies. The Board also approved the liquidation of Arjou; however, no Extraordinary General Assembly meeting was called to ratify this resolution. Subsequently, on 18 February 2024, the Board of Directors of Juhayna approved the agreement signed with the foreign shareholder, under which the foreign shareholder agreed to transfer its shares to Juhayna Food Industries Company without any financial consideration. As a result, Arjou is to become wholly owned by Juhayna. The legal procedures for the transfer of ownership have not yet been completed.

Juhayna Food Industries
(An Egyptian Joint Stock Company)

**** Debt Instruments At Amortized Cost - Fixed Return Listed in Market**

The Financial asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows. The objective of the business model is to retain the financial assets to collect contractual cash flows representing the principal amount invested and the related interest income.

Sales are considered an incidental and exceptional event for the purpose of this model, and in accordance with the conditions set out in the standard : which relate to the principal amount of the investment and the related interest income.

- Deterioration in the creditworthiness of the issuer of the financial instrument.
- Low level of sales in terms of value, as the Bank's business model objective does not permit, when applicable, the disposal of these instruments before their contractual maturity, except within the limits allowed by the standard, namely (sales that are insignificant in value, infrequent, or close to maturity).
- Clear documentation should be maintained to support any sale and its compliance with the standard .

In accordance with Prime Minister Decree No. 4575 of 2023, debt instruments issued by the Egyptian government, as well as current accounts held with Egyptian banks in local currency are exempt from the recognition and measurement of expected credit losses.

18- Tax status

Pre-Merger Period

A: Juhayna Food Industries Company (the Merging Company)

1- Corporate Income Tax:

The Company submits tax returns within the legal deadlines in accordance with the provisions of Income Tax Law No. 91 of 2005 and its amendments, and Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Period from commencement of activity on 17/01/1996 to 31/12/2018:

The competent tax authority conducted a tax inspection for this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2020–2025:

Tax returns were submitted on time. The Company has not been requested for inspection by the tax authority.

2- Payroll Tax:

Period from commencement of activity on 17/01/1996 to 31/12/2022:

The competent tax authority inspected this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2023–2025:

Quarterly adjustments and returns are submitted within the legal due dates.

3- Stamp Duty:

Period from commencement of activity on 17/01/1996 to 31/12/2022:

The competent tax authority inspected this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2023–2025:

Monthly returns are submitted on time in accordance with the law. No inspection have been conducted.

4- Sales Tax / Value-Added Tax (VAT):

Period from commencement of activity on 17/01/1996 to 31/12/2020:

The competent tax authority inspected this period. All tax disputes were fully resolved, and the Company paid the due taxes.

Years 2021–2025:

Tax returns are submitted on time. No inspection has been requested.

5- Tax Withheld at Source:

The Company regularly submits quarterly returns within the legal due dates.

B: International Modern Food Industries Company

1- Corporate Income Tax

Commencement of Activity:

- The Company commenced operations on 31/05/2008 as stated in its tax card.
- The company is subject to Law No. 8 of 1997 (Investment Guarantees and Incentives Law), and was exempt from corporate income tax until 31/12/2018.
- The Company submits tax returns in accordance with Income Tax Law No. 91 of 2005 and its amendments, and Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Years 2009–2014:

- The Large Taxpayers Center conducted a book inspection for these years and according to a re- inspection memorandum dated 20/11/2019, the automatic tax exemption certificate issued by the competent authority (General Authority for Investment) was not acknowledged.
- The tax authority issued a tax assessment (Form 19 Taxes), and the Company filed an objection within the legal timeframe.
- The dispute was referred to the Tax Appeal Committee under appeal No. 580/2022, which, in its session dated 30/08/2022, upheld the authority's decision not to recognize the tax exemption.
- Although the committee's decision lacked sound legal justification, it nonetheless obligates the Company to pay the tax, even if contested in court, as per the last paragraph of Article 64 of Law No. 206 of 2020 (Unified Tax Procedures Law).
- Therefore, it is recommended that the Company pays the due tax in execution of the appeal committee's decision to avoid administrative seizure of bank accounts, while continuing legal proceedings before the administrative judiciary.
- Based on the legal advisor's report submitted to us, the Company is entitled to the tax exemption.
- We support this conclusion — from our legal and technical perspective — regarding the Company's right to exemption for the disputed years, relying on the automatic exemption certificate issued by the General Authority for Investment dated 23/12/2008, Supporting letters dated 10/11/2009 and 25/03/2021, The Appeal Committee's decision violates Article 64 of Investment Law No. 8 of 1997, and Circulars from the Tax Authority (Nos. 27/2006 and 21/2015) obliging all affiliated entities to apply exemptions stated in certificates issued by the Investment Authority.
- The Company submitted a request on 13 December 2022 to bring the case before the Dispute Resolution Committee, and the file is currently under review.

Years 2015–2018:

A provisional assessment (Form 19) was received and objected to within legal time limits. A decision was issued to perform an actual inspection.

Years 2019–2025:

Tax returns were submitted on time. The Company has not been selected for inspection.

2- Payroll Tax:

Period from 31/05/2008 to 31/12/2022:

The tax authority completed its inspection for this period. Disputes were resolved and the Company paid the due taxes.

Years 2023–2025:

The Company submits quarterly returns and the annual reconciliation within the legal due dates.

3- Stamp Duty:

Period from commencement of activity until 31/12/2022:

The Company was inspected and paid the due tax.

Years 2023–2025:

No inspection has been requested by the authority.

4- Sales Tax / Value-Added Tax (VAT):

The Company submits monthly VAT returns on time.

Period from commencement of activity until 31/12/2020:

The tax authority inspected the Company and the due differences were paid.

Years 2021–2025:

VAT returns are submitted on time and no inspection has been conducted.

5- Withholding Tax:

The Company regularly submits quarterly returns within the legal due dates.

C: The Egyptian Dairy Products Company

1- Corporate Income Tax:

The Company submits tax returns within the legal deadlines in accordance with Income Tax Law No. (91) of 2005 and its amendments, and the Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Period from the start of operations on 03/10/2001 to 31/12/2004:

The competent tax authority inspected the Company for this period. Tax disputes were resolved and the due taxes were paid.

Years 2005–2008:

The tax authority has not inspected the Company for this period. Tax returns are submitted on time in accordance with the law.

Years 2009–2017:

The Company was inspected and paid all due amounts.

Years 2018–2025:

The Company submit its tax returns on time and has not been selected for inspection.

2- Payroll Tax:

Period from the start of operations on 03/10/2001 to 31/12/2022:

The competent tax authority inspected the Company for this period. Disputes were resolved and the due taxes were paid.

Years 2023–2025:

The Company submits quarterly returns and annual reconciliations within the legal deadlines in accordance with tax law.

3- Stamp Duty:

Period from the start of operations on 03/10/2001 to 31/12/2020:

The Company was inspected and paid the due stamp duty.

Years 2021–2025:

Preparation for the tax examination is currently in progress.

4- Sales Tax / Value-Added Tax (VAT):

24-3 Deferred Government Grants

One of the merged companies obtained a loan amounting to EGP 91.4 million from the Commercial International Bank (CIB) in August 2022. The full loan amount of EGP 91.4 million was utilized under the Central Bank of Egypt's initiative to support industrial companies. According to the initiative the loan was granted at a preferential interest rate of 8% which is lower than the prevailing market rate for similar loans which averaged 19.25% at the date of the loan.

The government grant arising from the interest rate difference amounted to EGP 5 215 562 analyzed as follows:

- (a) Deferred income – non-current liabilities: EGP 386 954
- (b) Deferred income – current liabilities: EGP 1 812 703
- (c) Other income – statement of profit or loss: EGP 3 015 905 as of 31 December 2025 No income was recognized during the comparative period. (Note 7)

The following is a statement of loan balances and deferred income for government grants: -

	Less than one year	More than one year	Total
	<u>L.E</u>	<u>L.E</u>	<u>L.E</u>
Loan	22 850 000	22 850 000	45 700 000

Balance as of 31/12/2025	21 037 297	22 463 046	43 500 343

25-Bank credit facilities

The balance of this item amounting to EGP 5 111 561 262 as of 31 December 2025 (compared to EGP 2 307 878 as of 31 December 2024) represents the utilized credit facilities granted by several banks including:

- CIB: EGP 2 126 642 802
- HSBC: EGP 465 291 000
- QNB: EGP 499 631 369
- AWB: EGP 298 788 363
- NBD: EGP 955 059 718
- NXT: EGP 16 148 333

The total credit facilities amount to approximately EGP 5.111 billion with a variable interest rate (corridor rate $\pm$ 0.25%) secured by promissory notes obtained by the banks providing these facilities to the company.

26-Provisions**26-1 Provision for claims**

Description	Balance at 01/01/2025 L.E	Merge Adjustments L.E	Used during the period L.E	No longer required provisions L.E	Balance at 31/12/2025 L.E

Deferred Tax of decrease trade receivables	1 396 591	
	<u>2 968 326</u>	<u>-</u>

The Company has not recognized deferred tax assets for these amounts until management completes the necessary data required to meet the Tax Authority's requirements. The amounts represent the excess of the acquisition cost of certain fixed assets (excluding land) over their book values, which were merged into Juhayna from Al Marwa Food Industries Company.

29- Financial instruments**Financial risk management****Overview**

The company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board is responsible for developing and monitoring the Company's risk management policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company through its training and management standards and procedures aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Board oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's Board is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures the results of which are reported to the B.O.D.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty fails to meet its contractual obligations. It arises principally from trade receivables and financial investments.

Aging Category	Total Balance	Expected Credit Loss
Not due	76 208 221	32 185
Due from 1 to 120 days	146 382 805	5 472 553
Due more than 120 days	1 560 741	702 334
Total	224 151 767	6 207 072

Trade and other receivables

The company has dealt with a major client (related party) who in turn distributes credit risks to a number of clients with strong and stable financial positions. The company also deals with its clients through contracts and agreements signed with them. Additionally, the company (related party) reviews the credit limits granted to its clients periodically and obtains adequate collateral from its clients. A client is considered in default if the payment is delayed for 120 days.

Credit risk**Exposure to credit risk**

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	Note	Carrying amount

		L.E	L.E
Trade and other receivables	(20)	595 995 646	4 961 931
Cash	(21)	705 820 715	11 645 741
Related Parties	(34-1)	2 087 033 755	361 048 333

The Company assesses credit risk of its customers based on forward-looking information related to expected credit losses, including the evaluation of default risk using external sources and publicly available information, in addition to data derived from the company's historical experience and management judgment. Credit risk is measured using quantitative and qualitative approaches to assess customers' ability to meet their contractual obligations and is benchmarked against external credit rating sources.

Credit risk on receivable and bank balances is limited as:

- Cash balances and time deposits held with banks that have a credit rating ranging from B to BBB+.
- The Group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. These adjusted loss rates in the current year are similar to the effective loss rates observed in the prior year. The Group has identified the GDP, unemployment rate, inflation rate and interest rate of the countries in which it sells its goods and services to be the most relevant factors and accordingly adjusted the historical loss rates based on expected changes in these factors.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure as far as possible that it will always have enough liquidity to meet its liabilities when due under both normal and stressed conditions without incurring unacceptable losses or risking damage to the Company's reputation.

The Company uses activity-based costing to cost its products and services which assists it in monitoring cash flow requirements and optimizing its cash return on investments. Typically, the company ensures that it has sufficient cash on demand to meet expected operational expenses for a year of 60 days including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted such as natural disasters. In addition, the Company maintains the following lines of credit.

Banks - credit facilities in a principal amount of L.E 5 171 185 on which the interest is charged at a variable interest rate for facilities in Egyptian pound. Interest on loans and credit facilities denominated in U.S Dollars and Egyptian Pounds shall be payable at a variable interest rate.

Liquidity risks

The liabilities due to the Company's suppliers and bank at reporting date of the separate statement of financial position are as follows:

31/12/2025

	Total book value	Contractual cash flows	6-12 months	1-5 years
Trade payables	1 319 574 322	1 319 574 322	1 319 574 322	-
Loans	1 379 271 201	1 970 596 470	165 336 699	1 805 259 772
Credit facilities	5 111 561 262	6 133 873 514	6 133 873 514	-
Lease liabilities	133 574 428	276 758 828	79 707 739	197 051 089

Market risk

Market risk is the risk that changes in market prices such as foreign exchange rates interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return.

The Company incurs financial liabilities in order to manage market risks. All such transactions are carried out within the guidelines set by the management.

Currency risk

The Company is exposed to currency risk on sales purchases and borrowings that are denominated in a currency other than the respective functional currencies of the Company primarily the L.E The currencies in which these transactions primarily are denominated are Euro USD and Swiss Francs (CHF).

In respect of other monetary assets and liabilities denominated in foreign currencies the Company's policy is to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

Foreign currency risk

Exposure to currency risk

The company's exposure to foreign currency risk was as follows based on notional amounts:

	USD	Euro
Trade and other receivables	11 140 140	979 358
Cash and cash equivalents	12 316 498	1 019 733
Creditors and other credit balances	(29 220 477)	(5 277 141)
31 December 2025	(5 763 839)	(3 278 050)
31 December 2024	(876)	1 427

The following significant exchange rates applied during the year:

	Average rate		Closing Rate	
	2025	2024	2025	2024
USD	49.31	45.6	47.74	50.91
Euro	55.85	49.3	56.09	53

Sensitivity analysis

The decrease of the Egyptian pound, as illustrated above, against the following currencies—USD and EUR—as of 31 December 2025, may lead to a decrease in shareholders' equity and profit or loss, based on the amounts presented below. This analysis is based on exchange rate fluctuations that the company considers reasonably possible as of the date of the separate interim financial position. The analysis assumes that all other variables, particularly interest rates, remain constant and disregards the impact of forecasted revenues and expenses.

	31 Dec 2025
EGP	10% Effect
USD	(27 516 567)
Euro	(18 386 582)

Interest rate risk

The Company adopts a policy of ensuring that its exposure to changes in interest rates on borrowings is on a fixed-rate basis considering assets with exposure to changes in interest rates.

A reasonable possible change of 1% in interest rates at the reporting date could increase (decrease) equity and profit or loss by the amounts described below. This analysis assumes that all other variables particularly foreign exchange rates remain constant.

	Profit or Loss	
	1% increase	1% decrease
31 December 2025 (Variable Interest Rate)	6 490 832	(6 490 832)
31 December 2024 (Variable Interest Rate)	1 923	(1 923)

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor creditor and market confidence and to sustain future development of the business. Capital consists of paid-up capital and retained earnings and reserves.

35- Board of Director's remuneration

- The total allowances and bonus received by the board of directors during the period amounted to LE 14 705 000 against LE 515 000 during the period ended 31 December 2025.

36- Distribution of some of the holding company's expenses

The company, pursuant to the decision of the Board of Directors No. 300 held on 24 June 2025, approved the renewal of the contract to distribute its expenses to Taiba Trading and Distribution Company during the year 2025 and used the company's percentage of contribution to the combined net sales as a basis for charging these costs to the company through January and February.

37- Earnings per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period after reducing dividends to employees and BOD as follows :

	31/12/2025	31/12/2024
	L.E	L.E
Net Profit / (Loss) for the Period as per the separate Statement of Profit or Loss	1 292 020 646	21 527 625
Less:		
Share of employees*	(264 517 998)	-
Employees and board of directors shares*	(13 000 000)	-

Machinery and Equipment	30 241 732
Buildings, Constructions, and Utilities	7 631 100
Land	2 382 082
Tools and Instruments	907 092
Vehicles and Transportation Means	11 084
Total	41 173 090
Accumulated Depreciation of These Amounts as of the Merger Date	(38 791 008)
Net Amount (Representing Land Value Only)	<u>2 382 082</u>

Impairment of Goodwill

Goodwill is tested for impairment annually, or more frequently if there are indications of impairment. For cash-generating units (CGUs) to which goodwill has been allocated because of a business combination, the impairment test is performed by comparing the carrying amount of each CGU with its recoverable amount.

The recoverable amount is determined based on the value in use calculation using cash flow projections derived from financial forecasts approved by senior management, covering a five-year period. A pre-tax discount rate is applied to the projected cashflows of the relevant CGUs, ranging from 20.9% to 26.3%. For the terminal value, the Gordon growth model is applied to the cashflows of the final year of the forecast period, using a long-term growth rate of 3%. The value in use is most sensitive to changes in the assumptions relating to the pre-tax discount rate.

Management has determined the values assigned to each of the key assumptions based on the following :

(a) Sales growth assumption

Sales growth rate, representing the average annual growth rate over the expected five-year period, based on past performance and managements expectations for market development .

(b) Pre-tax Discount Rate

Pre-tax discount rate A discount rate, namely weighted average cost of capital (WACC), is applied for specific business areas based on assumptions regarding interest rates, tax rates and risk premiums and is recalculated to a before-tax rate ('Pre-tax discount rate').

The assumptions used in the value in use calculations, for which the recoverable amount is most sensitive, are follows:

Sensitivity to changes in assumptions – Egyptian Company for Dairy Products

The following assumptions are most sensitive to changes in key assumptions:

(a) Sales growth assumption

Sales growth during the forecast period has been estimated at a compound annual growth rate (CAGR) of 8%, assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

(b) Pre-tax Discount Rate

The pre-tax discount rate during the forecast period has been estimated at 20.9%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

Sensitivity to changes in Assumptions- Al Marwa Food Industries Company

The following assumptions are the most sensitive to changes in the key assumptions:

(c) Sales Growth Assumption

Sales growth during the forecast period has been estimated at a compound annual growth rate (CAGR) of 3%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the compound annual growth rate.

(d) Pre-tax Discount Rate

The pre-tax discount rate during the forecast period has been estimated at 26.3%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

39- Merger

The Extraordinary General Assembly of the Company, convened on 26 December 2024, approved the report of the committee formed by the decision of the Minister of Investment and International Cooperation No. 95 of 2018, issued under registration No. 1290 dated 10 November 2024 by the Economic Performance Sector of the General Authority for Investment and Free Zones, for the purpose of evaluating the net equity of both the merging company (Juhayna Food Industries Company) and the merged companies (International Company for Modern Food Industries, Egyptian Company for Dairy Products, Egyptian Company for Food Industries – Egyfood, and Al Marwa Company for Food Industries) at book value based on the financial statements of these companies as of 31 December 2023. This was recorded in the commercial register of the Company on 27 February 2025. Accordingly, the balances of the merged companies listed below were merged into the merging company on the same date.

41- New Editions and Amendments to Egyptian Accounting Standards

on 3 March 2024 another decision was issued by the Prime Minister No. (636) of 2024 amending some other provisions of the Egyptian accounting standards and the following is a summary of the most important of those amendments 1 January 2025 .

A- Impact on the financial statements

The standards under study for application	Summary of the most significant amendments	Potential impact on the financial statements	Effective date
Egyptian Accounting Standard No. (50) "Insurance Contracts".	1-This standard determines the principles of recognition of insurance contracts falling within the scope of this standard and determines their measurement presentation and disclosure. The objective of the standard is to ensure that the Company provides appropriate information that truthfully reflects those contracts. This information provides users of financial statements with the basis for assessing the impact of insurance contracts on the Company's financial position financial performance and cash flows. 2-Egyptian Accounting Standard No. (50) replaces and cancels Egyptian Accounting Standard No. 37 "Insurance Contracts". Any reference to Egyptian Accounting Standard No. (37) in other Egyptian Accounting Standards to be replaced by Egyptian Accounting Standard No. (50). 3-The following Egyptian Accounting Standards have been amended to comply with the requirements of the application of Egyptian Accounting Standard No. (50) "Insurance Contracts" as follows: - Egyptian Accounting Standard No. (10) "Fixed Assets". - Egyptian Accounting Standard No. (23) "Intangible Assets". - Egyptian Accounting Standard No. (34) " Investment property ".	It was officially applied during the period No impact on the financial statements period separate	Egyptian Accounting Standard No. (50) is effective for annual financial years starting on 1 January 2025 and if the Egyptian Accounting Standard No. (50) shall be applied for an earlier year the Company should disclose that fact.
Accounting Interpretation No. (2) "Carbon Reduction Certificates" The Prime Minister's decision No. 636 of 2024 issued on 3 March 2024	Carbon Credits Certificates: Are financial instruments subject to trading that represent units for reducing greenhouse gas emissions. Each unit represents one ton of equivalent carbon dioxide emissions, and are issued in favor of the reduction project developer (owner/non-owner), after approval and verification in accordance with internationally recognized standards and methodologies for reducing carbon emissions, carried out by verification and certification bodies, whether local or international, registered in the list prepared by the Financial Regulatory Authority "FRA" for this purpose. Companies can use Carbon Credits Certificates to meet voluntary emissions reduction targets to achieve carbon trading or other targets, which are traded on the Voluntary Carbon Market "VCM".	It was officially applied during the period No impact on the financial statements period separate	The application starts on or after the first of January 2025 early adaption is allowed.

42-Comparative numbers

The comparative figures presented in the separate financial statements represent the balances of the approved separate statement of financial position of the merging company as of 31 December 2024 and the balances of the statement of profit or loss for the corresponding period of the previous year.
